

# DESIGN PROPOSAL

## DESIGN INTENT

The proposal presented for Halkett Street considers the diverse character of St. Helier and the various other public realm projects implemented in recent years, such as Charing Cross and Ann Court.

To honour both traditional and contemporary elements, the proposal offers a modern interpretation of Jersey granite paving while celebrating classic materials like cobbles. At the entrances from Hilgrove and Beresford, a row of 1000mm dark cobble paving will demarcate the proposed area from the existing. At the core of the site, the paving will use varying shades of grey, natural tones, and Jersey pink, with occasional darker blocks reminiscent of the cobble paving used at the entrances. This design element aims to provide a visually appealing and textured experience for pedestrians. Additionally, existing gullies will be replaced with more appropriately sized ones and granite drainage channel that aligns with the drainage strategy of Market Street. This channel will also introduce a linear element running North/South along the paving.

The selected street furniture will follow the language of the neighbouring streets: Georgian-style cast iron benches with Iroko hardwood and modern freestanding GRP planters, clad in matching hardwood. All the furniture is movable to accommodate future requirements, creating a flexible environment. Lighting will be provided using the Heritage Style Windsor Street lamp post, complemented by matching brackets capable of holding hanging baskets with varying vegetation. This selection provides a coordinating aesthetic while incorporating functional elements.

The planting palette will consist of native species with seasonal and vibrant characteristics, ensuring suitability for Jersey's coastal environment.

Artistic Impression - Halkett Street Scene

**01** HARMONISED PAVING ALONG HALKETT STREET USING VARIED COLOURED GRANITE PAVERS WITH OCCASIONAL DARKER TUMBLED BLOCKS

**02** 1000MM STRIPS OF DARK COBBLED PAVERS ACTING AS TRANSITION PAVING BETWEEN EXISTING AND PROPOSED

**03** GRANITE DRAINAGE CHANNEL. EXISTING GULLIES REDUCED IN SIZE AND NEW GRATES ADDED

**04** EXISTING FOOTWAY PAVEMENT ON BERESFORD STREET EXTENDED TO JUNCTION WITH HALKETT ST

**05** HERITAGE STYLE LAMP POSTS WITH HANGING BASKETS

**06** EXISTING PAVEMENT ON HILGROVE STREET EXTENDED TO JUNCTION WITH HALKETT ST

**07** EXISTING ALFRESCO AREAS RETAINED

**08** GEORGIAN STYLE BENCHES BY STREETMASTER AND MATCHING GRP PLANTERS CLAD IN HARDWOOD (TO BE INSTALLED BY CLIENT)

### LEGEND

#### SURFACE FINISHES

- Main pavement**  
Natural Granite paving; 300 x 200 x 110 mm; thick; Vehicle overrun; Laid to a running bond; Colours: TBC
- Threshold strips**  
Natural Granite cobble paving; 200 x 100 x 80 mm; thick; Vehicle overrun; Laid to a stack bond; Colour: dark grey
- Hilgrove St & Beresford St Junctions**  
Natural Granite paving; Vehicle overrun; Laid to a running bond; Colour & Sizes: To match existing
- Blister Tactile paving**; Color: 'Dark Grey'

#### KERBS & EDGING

- Public Pavement**  
Natural Granite Crossign Kerb; 150 x 150mm; Colour: tbc; Installed flush; In situ formed concrete bed and haunching to SE spec
- Hilgrove St Junction**  
Existing granite kerb to be retained where possible
- Natural Granite Kerb**; 300x200mm; Colour: to match existing; 125mm upstand; In situ formed concrete bed and haunching to SE spec
