

Havre des Pas Coastal Flood Alleviation Project – Community Engagement

The Government of Jersey is currently underway with a project to develop new coastal defences for the Havre des Pas and Greve d’Azette coastal areas.

Between June 2018 and January 2020 we completed work on a Shoreline Management Plan (SMP) for Jersey. (www.gov.je/smpreport) The plan aims to ensure that our coastal defences continue to protect the island over the next 100 years.

The Coastal Engineering Team at Infrastructure and Environment (I&E) would like to hear the views of residents and local business owners, on the coastal defence scheme and how it could support wider ambitions for the local area.

The scheme will cover the coastline between La Collette and Charrier Corner Slipway, shown in red on the map.

A series of community engagement workshops will be held so that nearby residents can share their views.

Each workshop will be 2-3 hours in length and will be led by I&E’s Coastal Engineering Team. Light refreshments will be provided.

Workshop attendees’ views will be collated and considered as we develop our engineering designs, mitigations and planning application. We would like feedback on:

- Q1. *Your concerns regarding the flood risk and the coastal environment within the scheme extents?*
- Q2. *What you value about the Havre des Pas coastal area?*
- Q3. *The priorities we should consider when managing the flood risk at Havre des Pas?*
- Q4. *Any improvements you want to see related to the coast?*

The workshops will be held at Société Jersiaise on Pier Road in the Members Room:

- Session 1: Tuesday 25th June 09:00 to 12:00
- Session 2: Tuesday 25th June 13:00 to 16:00
- Session 3: Tuesday 25th June 17:00 to 19:00
- Session 4: Wednesday 26th June 09:00 to 12:00
- Session 5: Wednesday 26th June 13:00 to 16:00
- Session 6: Wednesday 16th July 09:00 to 12:00
- Session 7: Wednesday 16th July 13:00 to 16:00

Numbers at each workshop will be limited to between 30 and 40 people to ensure that everyone can fully contribute. You only need to attend one event.

If you wish to attend a workshop please register interest at the 'Eventbrite' website and search 'Havre des Pas – Community Engagement'.

www.eventbrite.com/organizations/events

Agenda:

15 Mins Welcome

Arrival, sign in, tea or coffee.

45 Mins Event and Scheme Introduction

GoJ will present the Shoreline Management Plan and explain how the Havre des Pas Coastal Flood Alleviation scheme fits within the delivery of the plan, the timelines, funding. This will be followed by a discussion of the tasks that we will go through in the workshop and the aims of the workshop and the process to be worked through for the I&E Coastal Team to get input to the scheme's objectives and features.

90 Mins Group Discussion

Group discussions on each table to review the scheme extents and answer the following questions: • Your concerns regarding the flood risk and the coastal environment within the scheme extents? • What you value about the Havre des Pas Coastal area? • The priorities we should consider when managing the flood risk at Havre des Pas? • Any improvements you want to see related to the coast?

30 Mins Wrap-Up and Next Steps Presentation

Close to the event and presentation by I&E explaining the next steps in the process and reporting of the results of the workshop events.

Engagement Objectives:

The objectives of the engagement should be adhered to:

- Listen to the opinions and views expressed by other people.
- When developing the scheme proposals take any feedback into account, addressing it in an open, transparent manner.
- Engage with organisations, teams within organisations and individuals to seek their opinions.
- Ensure feedback is adequately considered.

A consultation report will be produced following the events and will be published on the Government of Jersey website.

Data Protection Information: Please note that should you need to contact Infrastructure and Environment (I&E) in relation to this work, we will need your name and contact details in order to respond to your enquiry. For details of how the Coastal section of I&E use your personal data please see the Transport & Highways' privacy notice on www.gov.je/highwayprivacy (Note: Coastal Engineering sits within the Operations & Transport directorate.)
