

Roads Committee date: 22 July 2026	Road reference & title of report: La Fredee Lane & La Rue des Cotils
Address: La Fredee Lane & La Rue des Cotils	Requested by: Government of Jersey Infrastructure and Environment – Drainage Department
Location map:  Yellow: La Fredee Lane – temporarily reversed eastwards from La Grande Route de St Jean to Vallée des Vaux Pink: La Rue des Cotils entrance – temporarily reversed westwards to La Grande Route de St Jean from Vallée des Vaux	Photograph/street view:  La Fredee Lane entrance (View from La Grande Route de St Jean junction)  La Rue des Cotils entrance (View from Vallée des Vaux junction)
Brief introduction/summary: The Government of Jersey Infrastructure and Environment Drainage Team has requested that the Parish Roads Committee approve the temporary reversal of traffic flow on La Fredee Lane and La Rue des Cotils. This change is required to facilitate the next phase of the drainage improvement works. The temporary traffic arrangements are expected to remain in place for up to four months. The Infrastructure and Environment Team will undertake resident notification through letter drops, install the necessary signage, and establish appropriate communication channels for residents who may experience an increase in traffic within their lanes during the diversion period. Whilst this temporary arrangement may result in some inconvenience, it is necessary to enable the progression and completion of the essential drainage works.
